COUNTER-BALANCED TILTING FLAGPOLES

All of the cone tapered aluminum flagpoles on pages 139 through 147 can be adapted with a counter-balanced tilt system. For ease of maintenance, the counter-balanced tilting flagpole has no equal. This unique design features a steel counter-weight inside the flagpole shaft to avoid disturbing the appearance of the tapered shaft. The base structure consists of two support channels welded to a base plate. The flagpole shaft is suspended by a pivot bolt and secured with a locking clip assembly. Anchor bolts are furnished for mounting to a concrete base. **Please allow 3 - 4 weeks after approval for shipping.**
